

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

True Potential Pictet Defensive A Accumulation Shares ISIN: GB00BMF19820

The Fund is a Sub-Fund of True Potential OEIC 2.

The Authorised Corporate Director of the Fund is True Potential Administration LLP, part of the True Potential LLP group.

Objectives and Investment Policy

The Fund seeks to deliver **growth** over a rolling **3 year** period net of fees.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 3 years.

The Fund will provide exposure to a mixed portfolio using a multi-asset strategy combining different asset classes such as shares, bonds and cash (as further explained below).

The Fund may also invest in shares; corporate bonds; government bonds; money-market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer); collective investment schemes; derivatives and forward transactions (including securities embedding derivatives); and deposits.

The Fund will typically (i.e. within normal market conditions) be invested with exposure to:

- 10% - 40% by value in listed shares (the exposure within normal market conditions is expected to be around 20%); and
- 60% - 90% by value in publicly traded corporate and/or government bonds (a loan, usually to a company or government, that pays interest), money market instruments, deposits and/or cash and near cash instruments (the exposure within normal market conditions is expected to be around 78%).

The above exposures may be achieved directly or indirectly, including through collective investment schemes. This may include schemes managed by the ACD, Investment Manager or sub-investment manager, or an affiliate of these parties.

Corporate bonds may include high yield debt (which have a higher risk of default but potentially offer higher returns to compensate). Government bonds may include emerging markets (bonds issued by less developed countries).

The Fund may also be invested up to 10% in commodities, metals, energy and agricultural products (the exposure within normal market conditions is expected to be around 2%). Exposure to commodities may be achieved indirectly through exchange traded products.

Accumulation Shares: Any income the Fund generates will be reinvested.

Derivatives may be used for investment purposes to a limited extent for; a) investment purposes, b) protecting against the effects of interest rate changes, c) to enhance income returns, d) to protect against default risks, e) to limit currency exposure.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

There are no geographic restrictions on the investments.

For full investment objectives, policy and risk factor details please refer to the **Prospectus**.

Risk and Reward Profile

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards
Lower risk

Typically higher rewards
Higher risk

The Fund is in a **medium category** because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.

Investment Fund Risk - This Fund invests into other investment funds, they may invest in different assets, economic sectors, or countries (including emerging markets) and therefore have different risk profiles not in line with those of this Fund.

Performance Risk - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.

Emerging Market Risk - Investments in emerging markets may involve greater risks due to political and economic instability, and underdeveloped markets and systems.

Counterparty Risk - There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.

Derivative Risk - The Fund is entitled to use derivatives for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.

Operational Risk - The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.

Credit Risk - Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.

Exchange Rate Risk - The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.

Investment Trust Risk - Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.

Liquidity Risk - Certain Market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.

The above risks may cause losses in the Fund.

For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing Charges	0.89%
------------------------	--------------

Charges taken from the Fund under specific conditions

Performance Fee	None
------------------------	-------------

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The Fund's annual report for each financial year will include detail on the exact charges made.

The ongoing charges figure is calculated as at 31/01/2024.

For further information about charges, please refer to relevant sections in the fund's prospectus at www.truepotential.co.uk/fund-documents

Past Performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 24/02/2022.
- Share class launch date: Acc: 24/02/2022.
- Performance is calculated in Great British Pounds (£).
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.
