

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

True Potential Allianz Balanced A Accumulation Shares ISIN: GB00BYNYXY18

The Fund is a Sub-Fund of True Potential OEIC 3.

The Authorised Corporate Director of the Fund is True Potential Administration LLP, part of the True Potential LLP group.

Objectives and Investment policy

The Fund aims to achieve **long term growth**.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund will invest at least 85% of its assets on a permanent basis in the Allianz RiskMaster Moderate Multi Asset Fund (Master Fund), which is a sub-fund of Allianz International Investment Funds.

The Fund has been established as a UCITS feeder Fund. The Master Fund aims to provide investors with long term growth by maintaining a bias towards investments which are considered higher risk but may invest, to lesser degree, in investments considered lower to medium risk.

The Master Fund will invest directly or indirectly in:

- Shares (unit of ownership in a company)
- Other investment funds (including those with exposure to the property market)
- Derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets)
- Alternative asset classes (including commodities indices and hedge funds indices) - indirect exposure only

The Master Fund may also invest in:

Bonds (issued by governments and other organisations), cash, money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer) and deposits.

The investment returns of the Fund are expected to be similar to the Master Fund. Differences in investment returns between the Fund and Master Fund may occur because the Fund may from time to time have more cash than the Master.

Accumulation Shares: Any income the Fund generates will be reinvested.

Derivatives and forward transactions may not be used for investment purposes or for Efficient Portfolio Management (EPM) by the Fund directly but may be invested in by the Master Fund.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

For full investment objectives and policy details please refer to the **Prospectus**.

Risk and Reward profile

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards
Lower risk

Typically higher rewards
Higher risk

The Fund is in a **medium category** because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.

Investment Fund Risk - The Master Fund is permitted to invest into other investment funds, they may invest in different assets, economic sectors or countries (including emerging markets) and therefore have different risk profiles not in line with those of this Fund.

Performance Risk - Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.

Counterparty Risk - There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.

Derivative Risk - The Master Fund is entitled to invest use derivatives for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.

Operational Risk - The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.

Credit Risk - Where the Master Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.

Exchange Rate Risk - The Master Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.

Liquidity Risk - Certain Market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.

The above risks may cause losses in the Fund. For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge:	0.00%
Exit Charge:	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing Charges	0.80%
------------------------	--------------

Charges taken from the Fund under specific conditions

Performance Fee	None
------------------------	-------------

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The Fund's annual report for each financial year will include detail on the exact charges made.

The ongoing charges figure is calculated as at 31/01/2024.

For further information about charges, please refer to relevant sections in the fund's prospectus at www.truepotential.co.uk/fund-documents

Past Performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 19/05/2016.
- Share class launch date: Acc: 19/05/2016.
- Performance is calculated in Great British Pounds (£).
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.
