

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

True Potential Cautious 5 Income Fund

A Accumulation Shares [ISIN: GB00BWDBHP77]

A Income Shares [ISIN: GB00BWDBHN53]

The Fund is a Sub-Fund of True Potential OEIC 2.
The Authorised Corporate Director of the Fund is True Potential Administration LLP, part of the True Potential LLP group.

Objectives and investment policy

The Fund aims to deliver long term (five years plus) total return in excess of inflation (UK Consumer Price Index) from exposure, directly or indirectly, to a diversified portfolio of investments. It should be noted that the long term total return that the Fund seeks to achieve will be net of fees. There is no guarantee that the Fund will achieve a positive return over the above, or any other period and investors should be aware that their capital is at risk.

The Fund will invest predominantly (at least 80%) in other investment funds.

The Fund may also invest in:

- closed-ended funds
- shares
- exchange traded funds
- bonds issued by governments and other organisations
- exchange traded commodities
- deposits, cash and money market instruments

The Fund may hold up to 100% of its assets in other investment funds.

The Fund will have exposure to both United Kingdom and overseas markets.

The Fund may also use derivatives for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital. The Fund may only use derivatives and forward transactions for investment purposes on the giving of 60 days' notice to Shareholders. The Fund does not currently use derivatives and forward transactions for investment purposes.

Income Shares: Any income the Fund generates will be paid out to you.
Accumulation Shares: Any income the Fund generates will be reinvested.

You can buy and sell shares on any day classed as a business day in London.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking the benchmark nor is the Fund constrained by the value, price or components of that benchmark or any other aspect. The benchmark is a target for the Fund, where the target return of the Fund aims to match or exceed the return of that benchmark.

For full investment objectives and policy details please refer to the Prospectus.

Risk and reward profile

The Risk and reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically Lower Rewards, Lower Risk

Typically Higher Rewards, Higher Risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The Fund is in a medium category because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Where this Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of this Fund.
- Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall.
- The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

The Fund's annual report for each financial year will include detail on the exact charges made.

The ongoing charges figure is calculated as at 31/05/2022.
