

# True Potential Close Brothers Cautious Income<sup>1</sup>

30 April 2025

## Fund objective

The Fund aims to achieve income in excess of 3% per year, with growth, over rolling 3-year periods (net of fees).

## April Update

April was a volatile month, as the unveiling of Trump's tariffs triggered a major sell-off across risk assets during the first half of the month. In developed markets, US equities posted the steepest declines while Emerging Market shares outperformed, supported by a strong rally in Latin America. In fixed income, German Bunds outpaced their sovereign counterparts, with global credit and high-yield bonds also delivering modest gains overall. Elsewhere, gold rallied as investors sought safe-haven assets while crude oil tumbled on growth concerns.

The True Potential Close Brothers Cautious Income Fund returned 0.81% (net of fees). The Fund's lower exposure to equities as compared to other TP Income funds proved an advantage in a volatile month for the asset class. Additionally, the Fund's allocation to UK shares was supportive as UK equities outpaced their global counterparts. At the stock level, key contributors included British insurer Phoenix Group and tobacco companies Philip Morris and Imperial Brands. Conversely, the Fund's exposures to distributor Bunzl and pharmaceutical firm Roche hindered relative returns. In fixed income, the Fund's allocation to UK Gilts was advantageous, with long-dated Gilts performing particularly well. In alternatives, the Fund's exposure to investment companies produced mostly positive returns, with the allocations to Greencoat UK Wind and British property firms Urban Logistics REIT and Residential Secure Income providing significant positive contributions. Elsewhere, a modest allocation to gold was supportive. Additionally, sterling strength was beneficial as the Fund hedges only half of its overseas currency exposure.

## Growth of £10,000 invested 5 years ago

## What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderately Cautious Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

<sup>1</sup>The name of the fund changed to "True Potential TrinityBridge Cautious Income" on the 19th of May 2025.

## Key fund information

**Accumulation shares:** this type of share reinvests the income generated by its underlying assets (such as dividends or interest) back into the fund, rather than paying it out to shareholders as income.

**Income shares:** this type of share pays out the income generated by the fund's underlying assets (such as dividends or interest) directly to investors, rather than reinvesting it back into the fund.

\* The 12 month yield reflects distributions declared over the past 12 months, as a percentage of the latest share/unit price. Investors may be subject to tax on their distributions. Yield as at 30 Apr 2025. Source: True Potential Administration LLP.

\*\*OCF payable can fluctuate over time as the underlying investments are variable and can change. The OCF figure is sourced from the Key Investor Information Document (KIID) dated 19 May 2025 found at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents).

## Who is this fund suitable for?

This fund is suitable for all investors under the advice of a professional adviser, or investing through the True Potential Portfolios. The minimum recommended holding period is 5 years. Please be aware there is no guarantee that the fund will meet its investment objectives. The Fund is available to those that do not need a capital guarantee and are aware that their capital is at risk. Clients who are unable to bear loss of capital should not invest in this Fund.

## What are the fees associated with investing in this fund?

The OCF of this fund is currently 0.63%. This means that if you invest £1000 in the fund, you can expect to pay £6.30 in fees over the course of a year. The fees you pay are pro-rata. If you hold the fund for less than a year you will only pay the proportional amount of fees applicable (based on the duration of your investment).

## Risks

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents). **Please be aware that there is no guarantee that capital will be preserved.**

Risk type	Description
Performance Risk	Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.
Counterparty Risk	There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.
Derivative Risk	The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.
Operational Risk	The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.
Credit Risk	Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.
Exchange Rate Risk	The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.
Investment Trust Risk	Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
Liquidity Risk	Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.
