# **True Potential Global Managed**

31 October 2025

#### **Fund objective**

The Fund aims to achieve growth over the medium term (3 years or longer).

#### **October Update**

Global equities delivered further gains in October, supported by US-China trade talks and signs of moderating inflation in the US. Emerging Market (EM) shares led the rally, underpinned by strong performance from Korean and Taiwanese technology shares. In developed markets, Japanese equities outperformed, while European and UK shares rose yet lagged global equities. In fixed income, UK Gilts outperformed amid lower yields. Elsewhere, gold was volatile but ended higher, supported by a softer US dollar.

The True Potential Global Managed Fund returned 3.22% (net of fees). The Fund's large exposure to equities proved beneficial, with US and Japanese shares performing particularly well. The allocations to EM equities also did well overall, despite a detraction from the Franklin FTSE China UCITS ETF. The iShares S&P 500 Equal Weight Fund also underperformed and we reduced our exposure over the month. The fixed income segment produced positive returns overall, benefiting from the Fund's allocations to UK Gilts and EM bonds. UK Gilts were a standout performer, as yields declined after the Bank of England signalled it expects to move towards lower interest rates. Meanwhile, the Fund's exposure to high-yield bonds detracted as the asset class lagged global equities and sovereign bonds. In alternatives, gold provided the most notable positive contribution, while the Fund's allocation to the BlackRock ICS Sterling Liquidity Fund delivered modest gains in absolute terms.

## Growth of £10,000 invested 5 years ago

#### What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderate Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

## **Key fund information**

**Accumulation shares:** this type of share reinvests the income generated by its underlying assets (such as dividends or interest) back into the fund, rather than paying it out to shareholders as income.

**Income shares:** this type of share pays out the income generated by the fund's underlying assets (such as dividends or interest) directly to investors, rather than reinvesting it back into the fund.

<sup>\*</sup> The 12 month yield reflects distributions declared over the past 12 months, as a percentage of the latest share/unit price. Investors may be subject to tax on their distributions. Yield as at 31 Oct 2025. Source: True Potential Administration LLP.

## Who is this fund suitable for?

This fund is exclusively available to investors via an auto-enrolment pension plan. The minimum recommended holding period is 5 years. Please be aware there is no guarantee that the fund will meet its investment objectives. The Fund is available to those that do not need a capital guarantee and are aware that their capital is at risk. Clients who are unable to bear loss of capital should not invest in this Fund.

## What are the fees associated with investing in this fund?

The OCF of this fund is currently 0.32%. This means that if you invest £1000 in the fund, you can expect to pay £3.20 in fees over the course of a year. The fees you pay are pro-rata. If you hold the fund for less than a year you will only pay the proportional amount of fees applicable (based on the duration of your investment).

#### **Risks**

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at www.truepotential.co.uk/fund-documents. **Please be aware that there is no guarantee that capital will be preserved.** 

| Risk type            | Description  |
|----------------------|--|
| Investment Fund Risk | This Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of this Fund.  |
| Performance Risk     | Investment objectives express an intended result but there is no guarantee that such a result will be achieved.  Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.     |
| Counterparty Risk    | There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.  |
| Derivative Risk      | The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.   |
| Operational Risk     | The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.   |
| Credit Risk          | Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating. |
| Exchange Rate Risk   | The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.   |
| Liquidity Risk       | Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.   |
