True Potential Pictet Cautious

31 October 2025

Fund objective

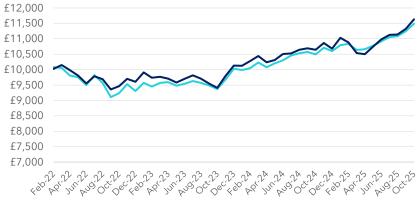

The Fund seeks to deliver growth over a rolling 3 year period net of fees.

October Update

Global equities delivered further gains in October, supported by US-China trade talks and signs of moderating inflation in the US. Emerging Market (EM) shares led the rally, underpinned by strong performance from Korean and Taiwanese technology shares. In developed markets, Japanese equities outperformed, while European and UK shares rose yet lagged global equities. In fixed income, UK Gilts outperformed amid lower yields. Elsewhere, gold was volatile but ended higher, supported by a softer US dollar.

The True Potential Pictet Cautious Fund returned 2.73% (net of fees). The Fund's sizeable exposure to equities was beneficial in a strong month for the asset class. All of the allocations to global thematic equity funds delivered gains in absolute terms, with the robotics, clean energy and digital themes outpacing global equities. Conversely, the Fund's exposures to high-dividend themes underperformed. Elsewhere, the tactical positions in Japanese, US technology and EM shares were supportive. In fixed income, the Fund's preference for UK Gilts relative to US Treasuries helped performance. UK Gilts were a standout performer, as yields declined after the Bank of England signalled it expects to move towards lower interest rates. The Fund's exposures to corporate credit and EM local-currency debt also helped returns. The allocation to commodities was advantageous with a notable contribution from gold.

What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderately Cautious Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

Why invest in this fund?

- For investors looking to invest for the long term (5 years or
- Diversifies risk by investing in stocks and bonds.
- The cautious strategy prioritizes steady growth with a reduced risk of short-term losses, making it more suitable for investors seeking stability during market fluctuations.

Risks

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at www.truepotential.co.uk/fund-documents. **Please be aware that there is no guarantee that capital will be preserved.**

Risk type	Description
Investment Fund Risk	This Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of this Fund.
Performance Risk	Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.
Emerging Market Risk	Investments in emerging markets may involve greater risks due to political and economic instability, and underdeveloped markets and systems.
Counterparty Risk	There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.
Derivative Risk	The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.
Operational Risk	The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.
Credit Risk	Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.
Exchange Rate Risk	The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.
Investment Trust Risk	Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall. The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
Liquidity Risk	Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.
