

# True Potential TrinityBridge Cautious

31 July 2025

## Fund objective

The Fund aims to provide income and moderate growth.

## July Update

Risk assets extended their rally in July, supported by US tariff deals and strong quarterly earnings. In developed markets, US equities outperformed while European and UK shares delivered solid gains in local-currency terms but lagged global equities. Meanwhile, Emerging Market (EM) equities outpaced their global counterparts, led by China, Taiwan and Korea. In fixed income, corporate bonds delivered modest gains while sovereign bonds underperformed amid higher yields.

The True Potential TrinityBridge Cautious Fund returned 1.38% (net of fees). A large allocation to equities proved beneficial, with the Fund's US equity bias and a tilt towards growth and cyclical shares adding value. Less positively, security selection hindered performance, with several large holdings delivering negative returns. At the stock level, key detractors included US-based insurer Elevance Health, financial technology and services provider Fiserv and healthcare solutions firm Cencora. The Fund's exposure to aerospace defence companies Thales and BAE Systems also hurt performance. Conversely, the Fund's sizeable exposures to Taiwan Semiconductor Manufacturing Company, Microsoft and British publishing firm Informa provided the most notable positive contributions. In fixed income, the allocation to UK Gilts detracted, with long-dated Gilts posting the biggest declines as UK core inflation edged higher. Elsewhere, the Fund's exposure to gold through the Invesco Physical Gold ETC and iShares Physical Gold ETC was supportive while sterling weakness over the month weighed on performance.

## Growth of £10,000 invested 5 years ago

## Why invest in this fund?

- For investors looking to invest for the long term (5 years or more).
- Diversifies risk by investing in stocks and bonds.
- The cautious strategy prioritizes steady growth with a reduced risk of short-term losses, making it more suitable for investors seeking stability during market fluctuations.

## What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderately Cautious Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

## Key fund information

**Accumulation shares:** this type of share reinvests the income generated by its underlying assets (such as dividends or interest) back into the fund, rather than paying it out to shareholders as income.

**Income shares:** this type of share pays out the income generated by the fund's underlying assets (such as dividends or interest) directly to investors, rather than reinvesting it back into the fund.

Fund details	Accumulation shares	Income shares
ISIN	GB00BV9FQR16	GB00BV9FQP91
12 month yield*	1.73%	1.76%
Launch Date	17/03/2015	17/03/2015
Ongoing Charges Figure (OCF)**	0.71%	0.71%

Sub-Investment Manager	TrinityBridge	TrinityBridge
Minimum Recommended holding period	5 years	5 years
Income payment frequency	Semi-Annual	Semi-Annual

\* The 12 month yield reflects distributions declared over the past 12 months, as a percentage of the latest share/unit price. Investors may be subject to tax on their distributions. Yield as at 31 Jul 2025. Source: True Potential Administration LLP.

\*\*OCF payable can fluctuate over time as the underlying investments are variable and can change. The OCF figure is sourced from the Key Investor Information Document (KIID) dated 19 May 2025 found at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents).

## Who is this fund suitable for?

This fund is suitable for all investors under the advice of a professional adviser, or investing through the True Potential Portfolios. The minimum recommended holding period is 5 years. Please be aware there is no guarantee that the fund will meet its investment objectives. The Fund is available to those that do not need a capital guarantee and are aware that their capital is at risk. Clients who are unable to bear loss of capital should not invest in this Fund.

## What are the fees associated with investing in this fund?

The OCF of this fund is currently 0.71%. This means that if you invest £1000 in the fund, you can expect to pay £7.10 in fees over the course of a year. The fees you pay are pro-rata. If you hold the fund for less than a year you will only pay the proportional amount of fees applicable (based on the duration of your investment).

## Risks

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents). **Please be aware that there is no guarantee that capital will be preserved.**

Risk type	Description
Performance Risk	Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.
Counterparty Risk	There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.
Derivative Risk	The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.
Operational Risk	The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.
Credit Risk	Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating.
Exchange Rate Risk	The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.
Liquidity Risk	Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.
