

True Potential Growth Portfolio

Portfolio Objective

The objective of the True Potential Growth Portfolio is to provide investors with a way to achieve their investment goals. The Portfolio offers full exposure to different manager styles within the Capital Growth risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles that we believe offers the best opportunity for growth within the Capital Growth risk profile. The Portfolio aims to produce a higher risk-adjusted outcome at a lower average cost, compared to an equally-weighted model of Capital Growth funds.

Risk Profile: Growth

The Growth Investor may be willing to accept high risk and chance of loss in order to achieve higher returns on his or her investment. Significant losses over an extended period may prompt the Growth Investor to shift to a less risky investment.

Ongoing Charge Figure (OCF)*: 0.74%

There are no entry or exit charges.

Launch Date: 1st October 2015

Investment Commentary

The True Potential Growth Portfolio produced a return of -0.13% for the month of October, net of Portfolio OCF.

October proved to be a challenging month for asset market returns. Within fixed income, the resilience of the US economy and uncertainty around possible policy changes post-election led to a gradual repricing of US interest rate cuts. Against this backdrop, yields climbed higher and prices fell for US Treasuries. UK gilt pricing also suffered against a backdrop of elevated borrowing from the UK budget. Global equities in sterling terms finished higher on the month, however the US was the only region to produce a positive return. Sterling depreciated against the US Dollar which pushed up US equity returns in sterling. Chinese equities were lacklustre as optimism faded with stimulus levels not yet reaching investor expectations.

The True Potential Close Brothers Growth fund outperformed the other funds within the Portfolio. Strong stock selection within US equities, and the fund's allocation to Gold, supported performance. The True Potential 7IM Growth fund's bias towards the UK within equities, and allocation to Japanese Yen in currencies, were headwinds to returns.

Over October, no change was made to manager allocations within the Portfolio with the Investment team believing that positioning is optimal. Although no changes have been made to manager allocations, the True Potential manager cohort have been adjusting positioning. Examples include additions to US and Emerging Market equities and a reduction in UK gilts.
