

True Potential Growth + Portfolio

Portfolio Objective

The objective of the True Potential Growth + Portfolio is to provide investors with a way to achieve their investment goals. The Portfolio offers exposure to a select group of investment partners and a range of risk profiles (Defensive to Aggressive), whilst remaining within the Capital Growth risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles that we believe offers the best opportunity for growth within the Capital Growth risk profile. The Portfolio aims to produce a higher risk-adjusted outcome at a lower average cost, compared to an equally-weighted model of Capital Growth funds.

Risk Profile: Growth

The Growth Investor may be willing to accept high risk and chance of loss in order to achieve higher returns on his or her investment. Significant losses over an extended period may prompt the Growth Investor to shift to a less risky investment.

Ongoing Charge Figure (OCF)*: 0.76%

There are no entry or exit charges.

Investment Commentary

The True Potential Growth+ Portfolio returned +0.69% in January 2024, net of Portfolio OCF.

The month of January was characterised by investors digesting the timing and magnitude of interest rate cuts in developed markets. Central banks have successfully made inroads in bringing down inflation with continued data analysis and the management of messaging their next steps. Developed market economies continue to exhibit resilience, particularly in the US where Q4 GDP came in at an annualised 3.3%. Against this backdrop, equity markets proved resilient but narrower led compared to previous months, providing modestly positive returns with US and Japan showing leadership. Developed markets outperformed emerging markets, with China lagging even after new stimulus from the People's Bank of China. Bond markets exhibited less resilience, generally providing negative returns as investors adjusted interest rate expectations. Commodities performed well buoyed by nervousness on supply due to the ongoing conflict in the Middle East.

Over the period, the True Potential UBS Aggressive fund performed strongly, benefitting from a larger weight to US equities. True Potential SEI Aggressive also posted good numbers with their momentum equity factor product providing strong returns.

Over the period, no changes were made to manager allocations, however it is important to note that this is an active decision, with the team believing current positioning is optimal. Over the month, managers have made changes to individual fund allocations. In aggregate, these include increasing exposure to high yield bonds and equities, funded from cash and government bonds.
