

True Potential Growth + Portfolio

Portfolio Objective

The objective of the True Potential Growth + Portfolio is to provide investors with a way to achieve their investment goals. The Portfolio offers exposure to a select group of investment partners and a range of risk profiles (Defensive to Aggressive), whilst remaining within the Capital Growth risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles that we believe offers the best opportunity for growth within the Capital Growth risk profile. The Portfolio aims to produce a higher risk-adjusted outcome at a lower average cost, compared to an equally-weighted model of Capital Growth funds.

Risk Profile: Growth

The Growth Investor may be willing to accept high risk and chance of loss in order to achieve higher returns on his or her investment. Significant losses over an extended period may prompt the Growth Investor to shift to a less risky investment.

Ongoing Charge Figure (OCF)*: 0.77%

There are no entry or exit charges.

Launch Date: 1st October 2015

Investment Commentary

The True Potential Growth+ Portfolio returned +2.52% in February 2024, net of OCF.

February was a positive month for equity markets, with market participants encouraged by resilient economic data and corporate earnings. The US equity market was positive, albeit returns were narrowly led by the technology, consumer discretionary and industrial sectors. A rebound in Chinese stock market returns was also supportive for global portfolios, influenced by several policy decisions from the Chinese government to moderate equity market short selling and volatility, but also encouraged by decisions to lower the 5-year loan prime rate (a benchmark for mortgage rates) and strong activity levels over the Lunar New Year holiday period. High-yield corporate bonds also benefitted however Government bonds and high-grade credit markets were negative over the month, as yields moved higher with investors pushing expectations for interest rate cuts further out after stronger-than-expected US inflation data. This also led to a strengthening of the US dollar on an international trade-weighted basis.

The best performing funds in the portfolio were True Potential Pictet and UBS Aggressive, benefitting from their larger allocation to US equities. The Schroder Balanced fund was the poorest performing fund, challenged by its preference for UK equities over the US.

Over the month, the True Potential Portfolio management team increased exposure to the True Potential Schroder Balanced. The fund has one of the lowest correlations to the other funds within the Portfolio, offering diversification by both manager view and positioning. We reduced the True Potential UBS Aggressive fund, which decreases portfolio risk to allow for consistency with the other Plus Portfolios' risk levels.

Over the month, managers have made changes to their individual fund allocations. In aggregate, these include increasing exposure to Japanese equities and investment-grade corporate bonds, funded from government bonds.
