

# True Potential Balanced Income Portfolio

## Portfolio Objective

The objective of the True Potential Balanced Income Portfolio is to provide investors with a way to draw a secure, regular and growing income. The Portfolio offers exposure to a select group of investment partners and a range of risk profiles (Cautious to Growth), whilst remaining within the Balanced risk profile. We review the Portfolio monthly and, if necessary, rebalance to the allocation of styles we believe offers the best potential for yield within the Balanced risk profile. The Portfolio aims to produce a higher than average yield, compared to an equally-weighted model of True Potential Wealth Strategy income funds.

## Risk Profile: Balanced

The Balanced Investor may be somewhat concerned with short-term losses and may shift to a more stable option in the event of significant losses. The safeties of investment and return are typically of equal importance to the Balanced Investor.

**Ongoing Charge Figure (OCF)\*:** 0.81%

There are no entry or exit charges.

**Launch Date:** 1st October 2015

Yield as of: 31 May 2024\*\* 3.64%

Portfolio Size: £793m

Strategy and Asset Allocation are subject to change at any time without notice, are for information purposes only and should not be construed as investment recommendations.

Please refer to the Fund Prospectus and Key Investor Information Document (KIID) for more information.

\*OCF payable can fluctuate over time as the underlying investments are variable and can change.

\*\*Income subject to revision in the current market environment.

Yield figure indicated on this page is the forward looking 12-month yield, net of charges and UK withholding tax.

Personal dividend tax charges may still apply and is subject to individual circumstances.

Tax rules may change in the future.

\*Under the current Packaged Retail Insurance and Investment Products (PRIIPS) guidance we consider all ongoing charges including those from closed ended vehicles such as investment trusts in the OCF (Ongoing Charges Figure) calculation. We use investment trusts to gain access to certain asset classes, such as infrastructure, their closed ended structure being an important feature in such asset classes. The return an investor earns from investing in an investment trust is determined by the performance of its share price. This is a disclosure change and the cost of investing in the fund does not change.

## Investment Commentary

The True Potential Balanced Income Portfolio returned +1.85% for the month of May.

May provided a strong backdrop for multi-asset investment with positive returns from both equities and fixed income. Investors were comforted with US inflation reasserting its downward path and corporate earnings continuing to surpass expectations. Regionally, US equities outperformed with US technology stocks providing outsized gains, due to investor enthusiasm over the prospects for artificial intelligence. Within fixed income, US Treasury yields declined as economic activity showed further signs of normalising. The Pound strengthened against the US dollar, +2%, as UK interest rates were recalibrated after the stronger than expected UK inflation report.

Within the Portfolio, the True Potential Threadneedle Monthly Income Fund performed strongly with strong equity selection beneficial over the month.

Over the period, no changes were made to the manager allocations within the Portfolio with the team believing that the positioning is optimal. The True Potential manager cohort actively updated their positioning over the months. Some examples include a view that equity market returns will broaden regionally with additions taking place to UK equities. High yield bonds remain in focus with further additions taking place on the view that elevated yield levels and a strong global economy mean the asset class is attractive right now.
