

True Potential UBS Income

Investment Manager

Sub-investment manager

Objective and Investment Policy

The Fund seeks to deliver income between 2% and 4% annually with potential for growth over a rolling 3 year period net of fees.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund may invest in shares; corporate bonds; government bonds; money market instruments; collective investment schemes; derivatives and forward transactions; and deposits.

The Fund may also invest in real estate, infrastructure, private debt, insurance linked securities, mortgage-linked securities and bank loans.

The Fund will typically (i.e. within normal market conditions) be invested with exposure to:

- 20% - 70% by value in listed shares (the exposure within normal market conditions is expected to be around 47%);
- 30% - 100% by value in publicly traded corporate and/or government bonds (a loan, usually to a company or government, that pays interest), money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer), deposits and/or cash and near cash instrument (the exposure within normal market conditions is expected to be around 52%); and
- 0% - 20% by value in alternative assets (including but not limited to real estate, infrastructure, private debt, insurance-linked securities, mortgage linked securities and bank loans) (the exposure within normal market conditions is expected to be around 1%). These may be achieved indirectly, including through securities which are closed-ended funds, such as investment companies or real estate investment trusts (REITs), or collective investment schemes.

The above exposures may be achieved directly or indirectly, including through collective investment schemes. This may include schemes managed by the ACD, Investment Manager or sub-investment manager, or an affiliate of these parties.

Corporate bonds may include high yield debt (which have a higher risk of default but potentially offer higher returns to compensate). Government bonds may include emerging markets (bonds issued by less developed countries).

Derivatives may be used for investment purposes to a limited extent for; a) investment purposes, b) protecting against the effects of interest rate changes, c) to enhance income returns, d) to protect against default risks, e) to limit currency exposure.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

There are no geographic restrictions on the investments.

The Benchmark for this fund is Morningstar UK Moderately Cautious Target Allocation, this is a Comparator Benchmark. The benchmark may be used as a guide to compare and assess the performance of the Fund. Our aim is to help you monitor how your investment is performing. The ACD believes this is an appropriate comparator benchmark, given the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 2 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 0.79%

There are no entry or exit charges.

Launch Date: 16 February 2022

Risk Profile: Balanced

The Balanced Investor may be somewhat concerned with short-term losses and may shift to a more stable option in the event of significant losses. The balance of investment risk and return are typically of equal importance to the Balanced Investor.

Why True Potential UBS Income?
